

iTrac is Convergent's web-based, value-added platform which allows for online, real-time project management. It provides a secure online environment where all stakeholders are able to track progress and efficiently collaborate on both individual sites and highly complex projects.

iTrac boosts project management by enhancing communication, providing instant access to the key documentation, and delivering time-saving and cost-efficient benefits for customers.

STREAMLINED COMMUNICATION

Speeds up project delivery and enhances product & labor selection

DETAILED DOCUMENTATION

Contains accurate records for warranty and future maintenance, repairs, or replacements

TIME AND LABOR SAVINGS

Enables cost savings by optimizing resources and reducing site visits

REAL-TIME PROJECT OVERVIEW

- Instant commissioning reports for project progress
- Seamless installation tracking that includes status, completion, testing, pass or fails, and fixes
- Sign-off on three main levels: installation team, end client, and third-party commissioning
- Access to real-time reporting on all project devices
- Real-time device test notifications

PROMPT ACCESS TO THE KEY DOCUMENTATION

- Easy navigation through project devices and documentation
- Records of any failed tests and fixes
- Customizable user fields to collect any type of device information
- Confirmation of the field of view for all video surveillance cameras
